

Fundermax

Wiener Neudorf site

For you to create

Fundermax

Highly resistant **Max Interior** and **Max Exterior compact laminates** – made from a mixture of cellulose layers and resins and used for facades, exterior applications (including garden furniture and balcony cladding) and interior fittings – are manufactured at the Wiener Neudorf site, among other products.

The production of the laminates in Wiener Neudorf has a long tradition stretching back to 1962. Today, compact laminates from Fundermax are exported to 80 countries around the world.

Alongside compact laminates, **high-pressure laminates** (HPL) and fire-resistant **m.look face panels** are produced at Wiener Neudorf. In the case of pressure laminates, multiple layers of resin-impregnated papers are compressed under high pressure and at high temperature in an elaborate process. These HPL panels are highly resistant to abrasion, impact and scratching and promise a high level of heat resistance. They are mainly used for interior surfaces subject to heavy stress (i.e. kitchens and bathrooms).

m.look is an architectural facade panel with a highly durable, non-flammable core and a strongly weather-resistant decorative surface which is highly resistant to scratching, impact and hail; it is also non-fade and easy to clean, with anti-graffiti properties. m.look is ideal for use in both exterior and interior areas. The panels are primarily used for fire-proof wall cladding/wall protection.

Facts & Figures:

- Approx. **520 employees** based at Wiener Neudorf
- Total floor space of approx. **81.500 m²**
- **Annual production capacity** of around **2.7 million square meters of HPL** and **5.2 million square meters of compact panels**
- Around **6,200 truck shipments per year**

About Fundermax:

Fundermax is the global market leader in **high quality facade panels** and the supplier of a **range of decorative products for interior design**, and a company with a **proud history spanning 130 years**. With state-of-the-art **production facilities** at five sites (St. Veit an der Glan/Carinthia, Wiener Neudorf/Lower Austria, Neudörf/Burgenland, Ranheim/Norway and Almelo/Netherlands), Fundermax makes consistent use of **sustainable materials** sourced from **natural raw materials**.

The comprehensive **product range** stands for **top quality, innovative design and sustainable production**. From raw chipboard panels and melamine faced chipboard (Star Favorit) to pressure laminates (HPL), compact boards (Max Exterior and Max Interior) and fire-resistant m.look facade panels, Fundermax applies precision at all stages.

Around the world, some 1,500 employees generate annual turnover of approximately € 500 million. Fundermax is part of **Constantia Industries AG**, one of Austria's largest privately run industrial concerns. In 2018, Fundermax was the overall winner of the **Staatspreis Unternehmensqualität** which, among other things, recognizes commitment to environmental and social causes.

Fundermax guarantees **top quality that is made in Austria**. With precision and a passion for natural wood, for 130 years.

Milestones for Wiener Neudorf:

1962

Business starts life as Isovolta at Wiener Neudorf

2002

Isovolta splits into Isovolta AG and Isomax AG

2005

Isomax merges with Funder to become Fundermax
