Processing company: _____ **City:** _____

Site management: _____ **Date of start at site:** _____

(Forename / Surname) _____ **Date of end at site:** _____

Did all the workers receive training? ☐ Yes ☐ No

Trained by? _____

Construction section

PV Module: _____

Dimension: Length: _____ mm   Width: _____ mm

Pre-treatment of module

☐ Cleaning with Innotec Solar Clean

Substructure

☐ New Roof

☐ Existing Roof: Age: ± _____

Pre-treatment of substrate

☐ Cleaning with Innotec Solar Clean

☐ Cleaning with Innotec Multisol

Panels

Metal substrates

PVC substrates

EPDM substrates

Bitumen substrates

Other

Bonding

Adhesive tape (double-sided)   ☐ Fixation Tape Project   Batch no. : _____

Adhesive   ☐ Adheseal   Batch no. : _____

☐ Membrane Adhesive   Batch no. : _____

☐ Versabond   Batch no. : _____

Building height _____ m

Number of panels _____

Roof slope: _____ %

Notice: Extreme or unusual conditions such as (strong) acids, ammonia and the like, as may be the case in sewage treatment plants, are exempt from these approvals and must be checked and approved separately. The condition and quality of the substrates, as well as the environmental conditions and exposure now and in the future can have a strong influence on the adhesive / adhesive materials used. The performance and quality of the bonding may deviate as a result. The service life of the adhesive connection can then not be guaranteed under any circumstances. These releases are for information only and do not replace own adhesion tests.

Signature

Distribution: With every contract 1 copy to the customer (in project file)
