Fundermax

Whether it's furniture, facades, or interior design: where ideas and materials meet, you'll find Fundermax. As a global market leader in the field of high pressure laminates and a manufacturer of high-quality wood-based materials, we are proud to look back on a history spanning more than 130 years. Our continued success is based on the highest quality standards, innovative and varied design, as well as carefully managed production processes. Made in Austria – with great love for natural resources, creations, and imagination.

- Modern production facilities in Austria, Norway and the Netherlands
- Approx. 1,500 employees
- Part of Constantia Industries AG
- Integrated management system certified according to ISO standards*: 9001 Quality, 14001 Environment, 50001 Energy efficiency, 45001 Occupational health and Safety
- Wood and paper sourced from FSC®- and PEFC-certified sources**
- Certified according to the SURE-EU system within the certified scope***

* Certified according to ISO 9001:2025, ISO 14001:2015, ISO 50001:2018 and ISO 45001:2018 for the St. Veit/Glan site, including the Wiener Neudorf and Neudörf/ Leitha locations, by SystemCERT Zertifizierungsges.m.b.H.

** FSC® [C101966], PEFC [06-35-246]

*** SURE-EU Certificate No.: SURE-EU/DE-011/Z03400097 and SURE-EU/DE-011/Z03400106

Facing Life – because life isn't a showroom.

Interior Pro 2.6 | Horizontal

Our collection for kitchen worktops and bathroom vanity tops.

This collection is a tribute to real life: to kitchens where cooking, spills, and laughter happen, and to bathrooms that don't just shine but tell stories. Interior Pro 2.6 | Horizontal combines premium design with everyday practicality – easy to maintain, durable, and resistant to everything life leaves behind. Crumbs, drops, stains? No problem! Because they tell the story of life.

For architects and planners who want to create spaces filled not just with aesthetics, but with character and authenticity. Whether understated and monochrome or boldly textured: the wide range of decors and surfaces offers creative freedom and pairs beautifully with other materials. The new Interior Pro 2.6 | Horizontal collection brings concepts to life – and stays strong even when everyday life leaves its mark.

- Our collection offers creative freedom, tailored to modern kitchen and bathroom design concepts
- Elegance in its most refined form: At just 12 mm, this worktop is thinner than many others and impresses with modern design and remarkable durability.
- Harmoniously matched core colors and authentic surface textures create a seamless concept that appeals both visually and to the touch
- APEX – the pinnacle of perfection: the tactile structure aligns precisely with the decor, enhancing the visual and sensory experience
- Easy to clean, non-porous, hygienic

Whether as a kitchen worktop or a bathroom vanity top – horizontal surfaces are put to the test every day. They must not only look good but also withstand what life brings: moisture, heat, scratches, and stains. That's exactly what the Max Compact panels of the new Interior Pro 2.6 | Horizontal collection are made for.

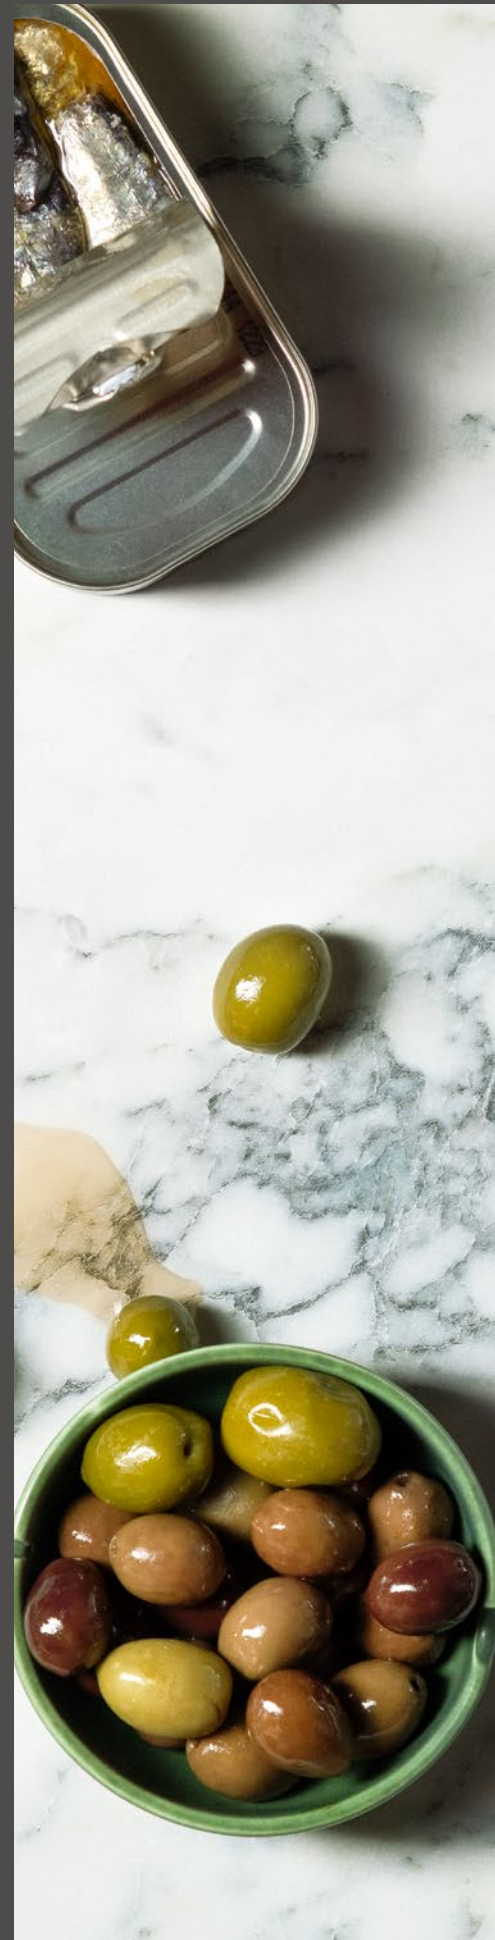

Extremely durable, hygienic,
and easy to maintain .
Our Max Compact Interior
worktops combine design with
true everyday practicality.

Whether in kitchens as the vibrant heart of daily life or in
humid bathrooms – they impress with durability, resilience,
and lasting aesthetics.

Specifically designed for horizontal surfaces, the wide
range of decors and finishes opens new creative freedom
and design possibilities.

0966 AP White Monumento Marble

Aesthetics meet Authenticity

Our decor selection brings the latest stone trends into interior spaces – from urban concrete and soft sandstone to elegant marble in both light and dark tones. Striking veining, crystalline structures, and natural hues give every room a unique atmosphere full of style and character.

Especially in kitchens and bathrooms, these materials create a clear, architectural aesthetic that radiates quality while preserving a natural feel.

Thanks to their natural color and texture, our decors integrate seamlessly into a wide range of interior styles. Their authentic appearance forms a stylish foundation – whether the look is deliberately minimalist, purist, or rich in contrast. This gives our customers the freedom to create bold accents with other materials or to let the calm, elegant character of our surfaces shine throughout.

APEX enhances clean lines, veining, and marble inclusions.

SAXUM emphasizes sandy and textured stones.

GRAFICA perfectly showcases fine-grained, uniform, and versatile materials.

The collection is rounded off by **APTICO** – our anti-fingerprint surface, which presents every color in a velvety-matte finish.

Y112 AS Charcoal Eldorado Granite

Core Colors

Our core color palette reflects the most popular material trends from ceramics, stone, and concrete – perfectly matched to modern interior design. From cool greys (0077, 0074) and whites (0606, 0085) to warm greige tones (2289, 2206), alongside the classic black core (0080), all the colors that define today's interiors are represented.

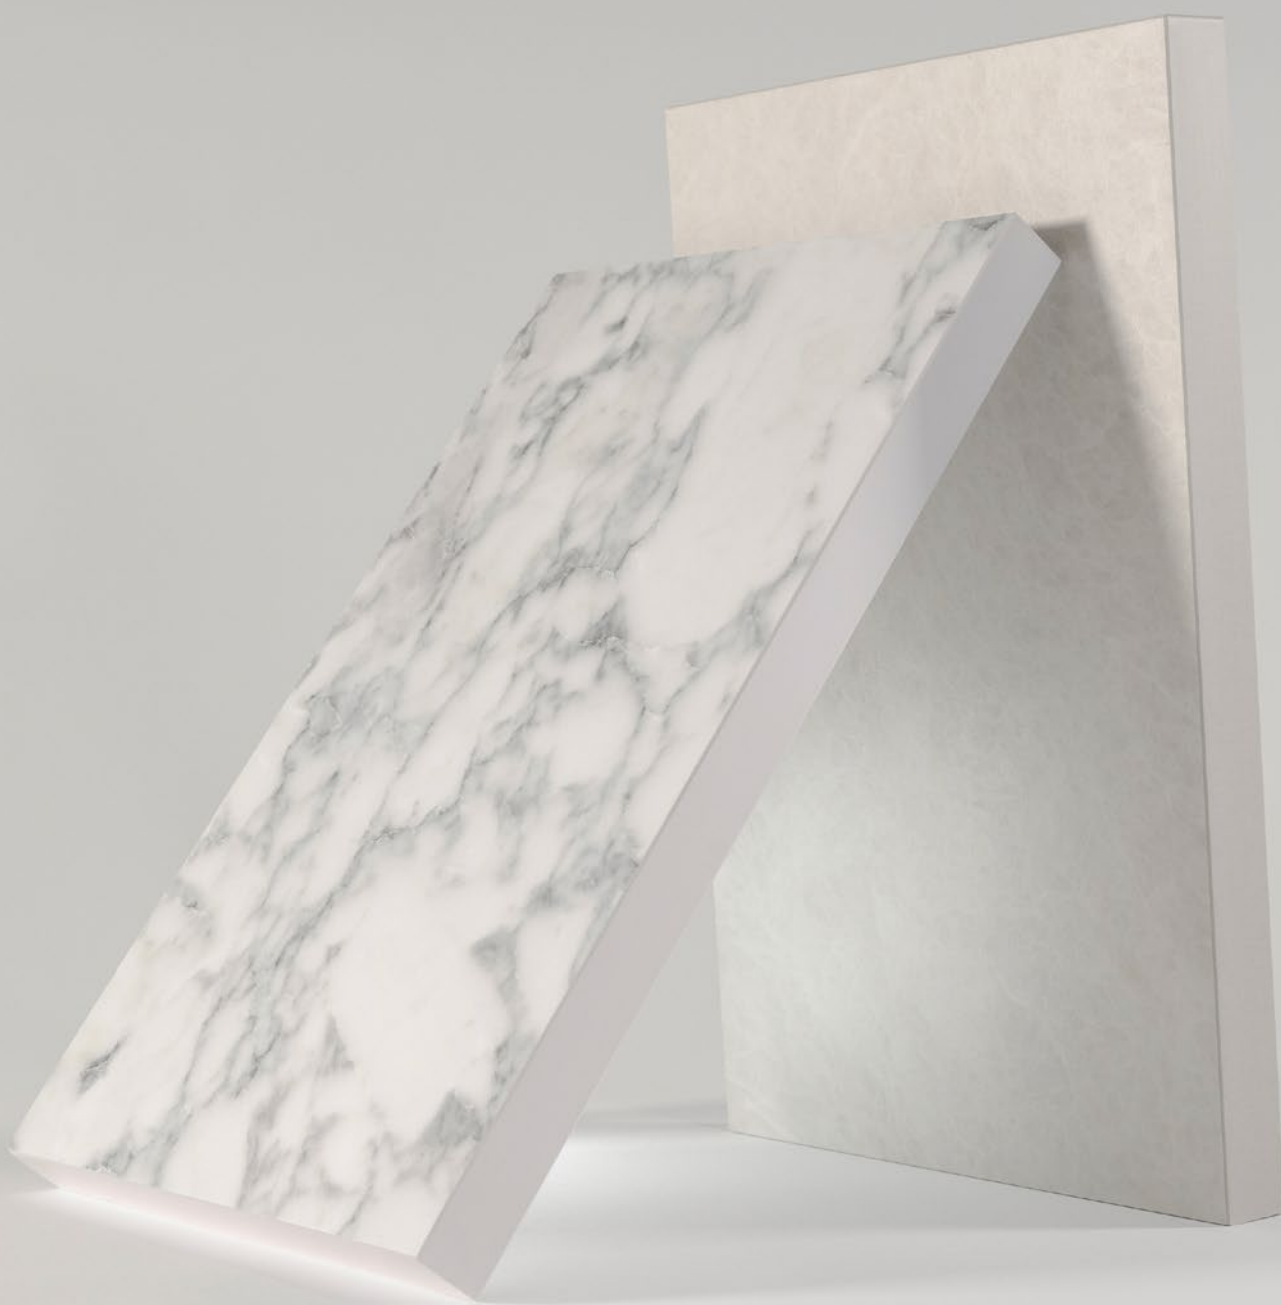

Decors

Good Taste starts with the Worktop.

The color palette of the collection ranges from deep black and cool graphite grey to crisp arctic white, warm white, and soft beige and brown tones.

The decor structures span from subtle nuances to bold designs with striking marbling or generous patterns – ideal for spaces where the material itself becomes a design statement. This allows for both minimalist room concepts and expressive, character-rich designs. The panels can be combined in many ways with materials and finishes used for cabinets, sinks, or fittings.

Each decor is paired with predefined core color combinations. These ensure a seamless transition between the decor surface and the panel core, creating a harmonious overall appearance.

Surfaces

Anything but superficial.

The panels in this collection are available in a carefully curated selection of surface finishes. When the right surface matches the decor, the design stands out even more – and the tactile experience complements the visual appearance.

SX SAXUM

This deeply structured surface brings elegant stone formations to life. Optimized for use in kitchens, it impresses daily with its ease of maintenance. The matte finish features an anti-fingerprint effect.

AP APTICO

Matte and flawless – the special anti-fingerprint technology keeps the elegant surface looking beautiful over time – for quality you can see and feel.

GA GRAFICA

GA GRAFICA is universally applicable. Its defining features are a rough, mineral texture combined with a matte, organic look reminiscent of plaster techniques.

APEX

The Pinnacle of Perfection.

Fundermax products

Y102 AA Black Montaro Travertine

Y102 AS Black Montaro Travertine

With APEX, the fusion of design and functionality reaches a new peak.

The perfect choice for worktops that demand exceptional aesthetics, tactile appeal, and quality.

The surface combines easy-care handling with high resistance to abrasion and scratches. Characteristic of APEX are the texture details that are precisely synchronized with each decor.

- Unparalleled, pleasant feel with a luxurious touch
- Immaculate cleanliness, even when frequently used
- Premium quality

Matte-gloss effects are harmoniously aligned with the design. The surface captivates with its soft touch feel and features an anti-fingerprint effect. Its tactile structure matches the printed pattern with precision, enhancing both the visual and tactile experience.

Product Properties

Max Compact Interior

Max Compact Interior panels are exceptionally durable high-pressure laminates with double-sided decor, manufactured in high-pressure presses under high temperature and pressure, in accordance with EN 438-4, Type CGS.

As standard, Max Compact Interior comes with a black core. For a particularly homogeneous appearance, this collection also offers Max Compact Interior panels in six additional core colors: White, Arctic White, Pastel Grey, Charcoal, Tortora, and Fango.

Discover more products and surface finishes at **fundermax.com**.
Perfectly compatible with your kitchen and bathroom cabinetry.

Key product features at a glance:

- High resistance to abrasion, impact, scratches, and extreme temperature fluctuations
- Resistant to cold and heat shock
- Easy to clean and solvent-resistant
- Long-lasting and highly resilient
- Antibacterial
- Properties in accordance with EN 438-4

Environment & Energy

Fundermax has been involved in environmental and energy management for more than 20 years, focusing on the following areas:

Corporate Responsibility

We aim to act responsibly in all our activities, managing resources and the environment with care and taking the concerns of our stakeholders into account. Fundermax has established a systematic environmental and energy management system with experts and designated officers, and is certified to the following standards: ISO 9001:2025 Quality, ISO 14001:2015 Environment, ISO 50001:2018 Energy Efficiency and ISO 45001:2018 Occupational Health and Safety for the St. Veit/Glan site, including the Wiener Neudorf and Neudörf/Leitha sites, by SystemCERT Zertifizierungsges.m.b.H.

Products from nature

For over 130 years, Fundermax has been working with precision and a passion for natural raw materials. We source 100 per cent of our wood and paper from certified sustainable forestry. At Fundermax, we are committed to the cascading use of wood. In the first cascade, we use wood for material applications, producing wood-based materials and compact laminates. The second cascade involves the use of wood for energy – only when wood can no longer be used for a product do we use it as fuel to generate green energy.

Energy generation and use

In St. Veit an der Glan and Neudörf, we generate certified green energy (electricity and process heat) for our production facilities in our combined heat and power plants. At our Wiener Neudorf site, our 7,000 m² photovoltaic system generates environmentally friendly electricity using solar power. In addition to generating and using green energy, we are also focusing on heat recovery and the expansion of district heating. We currently supply around 10,000 households in St. Veit an der Glan, Neudörf, Wiener Neustadt and Bad Sauerbrunn with district heating generated from our waste heat.

Careful production

In the manufacturing process of raw chipboard and Fundermax biofibreboard, we primarily use wood fibre from forest thinning that is no longer required by the sawmill industry. The wood fibre content of the biofibreboard is in fact around 99 per cent. Our Compact board consists of around 65% paper as a carrier material. We already meet half of our core paper requirements entirely with recycled core paper, which we source primarily from our Fundermax subsidiary Ranheim Paper & Board in Norway, a manufacturer of paper and board products. We also close the loop by using production residues – such as sanding dust, offcuts and wood fibres – as quality-assured substitute fuel in energy generation. Through the ongoing monitoring of our emissions, compliance with our limit values and the operation of state-of-the-art plant, we guarantee transparent processes across all areas of our production.

We bring to
perfection what
nature gives us.

Delivery Program & Format Overview

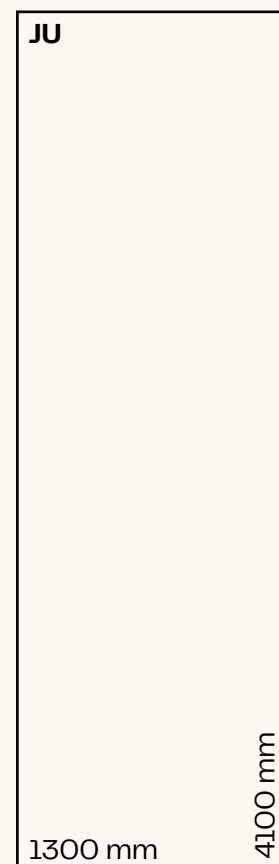

No One-Size-Fits-All.

Our delivery program provides a clear overview of all combination options and supports you in selecting the ideal solution for your project.

The panels in this collection are available in a format of 4100 × 1300 mm, with a standard thickness of 12 mm. Additional thicknesses are available.

For this collection, we've already matched each décor with the ideal core color for you.

Below you'll find an overview of all decors with their decor numbers, the available core colors for each decor, and the corresponding surface finishes. You'll also find information about the reverse-side decor and the available formats.

Our Services

Because everyday life is already complicated enough.

To offer you shorter delivery times, we have stocked the following standard formats (see delivery program for decor-surface combinations) in the standard thickness of 12 mm:

- 4100 x 640 mm
- 4100 x 900 mm
- 4100 x 950 mm

All Max Compact panels are supplied with finished edges. The format milling with chamfering on both sides is applied as follows:

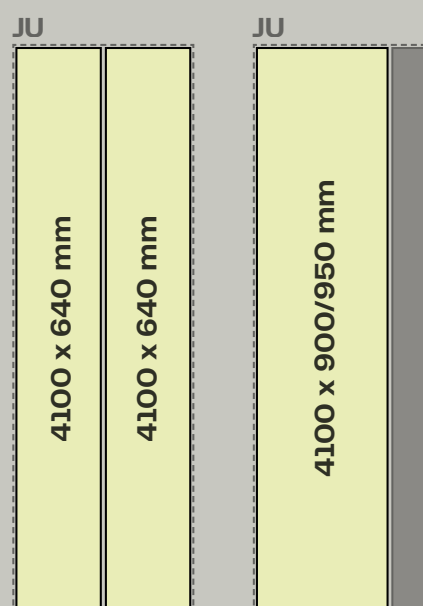

For a width of 640 mm, the chamfer is applied to one longitudinal edge.

For widths of 900 mm and 950 mm, the chamfer is applied to both longitudinal edges.

Milling depth: 1 mm, Milling angle: 45°

Cut-outs for sinks, fittings, or cooktops can be manufactured upon request – exactly according to your specified positions. Take advantage of the comprehensive service offering from our Compact Elements processing service.

Processing guidelines
Max Compact Interior

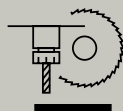

Precision Processing. For thoughtful designs and high-quality execution.

Our worktops can be processed precisely and easily using the right tools – whether in your workshop or directly on-site. Thanks to our processing guidelines, you benefit from practical tips, clever tricks, and proven recommendations that make handling easier. This ensures exact adaptation to the final dimensions of your kitchen or bathroom design – quickly, cleanly, and professionally.

Your path to digital perfection: Fundermax PBR data

With Fundermax, you not only receive high-quality products but also access to a world of digital possibilities.

Scan the QR code below to directly access the **PBR data** (Physically Based Rendering) for your product.

Cleaning Recommendations

Our Max Compact panels from the Interior Pro 2.6 | Horizontal collection are characterized by high durability and an especially easy-to-clean surface. The non-porous structure not only simplifies everyday care but also inhibits bacterial growth – a clear advantage when it comes to hygiene.

Detailed cleaning recommendations for our products can be found in the enclosed processing guidelines. These contain comprehensive information on the appropriate cleaning methods – tailored to different types of contamination.

Additional notes and supplementary care instructions are also available under **www.fundermax.com**

Mix & Match

Combine the Interior Pro 2.6 | Horizontal worktops with other products and finishes such as **Star Favorit** – ideal for kitchen fronts and furniture.
